The box plot displays the distribution of COVID-19 cases per year. The y-axis is labeled 'Cases' and ranges from 0 to 100,000. The x-axis is labeled 'Year' and ranges from 1990 to 2020. The plot shows that the number of cases was very low until around 2019, when it began to rise significantly. In 2020, there was a massive increase in cases, with the median reaching approximately 40,000 and the upper whisker extending to over 100,000. There are several outliers shown as individual points, particularly in 2020, where some cases exceeded 100,000.
